

## **PART 12 – REGIONAL PRIORITY (RP)**

## **Regional Priority**

Since each location has different regional issues and different environmental problems, USGBC identifies 6 credits from the existing LEED credits in each rating system that contribute more to those regional issues for that location. Projects can see the regional priority credits available for their location online at USGBC's website.

The “Regional Priority” credit contains 4 points, which means that if the project had achieved 4 out of the 6 regional priority credits, 4 points would thus be awarded.
